*Mechanicam vero duplarem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguitur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.*

NEWTON

*La généralité que j'embrasse, au lieu d'éblouir nos lumières, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.*

EULER

*... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum.*

LEIBNIZ

---

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely of original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style. The editors reserve the right to return to authors manuscripts found deficient in style, form, or clarity.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

## CONTENTS OF VOLUME 45

ARKERYD, L., On the Boltzmann Equation. Part I: Existence . . . . .	1
ARKERYD, L., On the Boltzmann Equation. Part II: The Full Initial Value Problem . . . . .	17
DUISTERMAAT, J. J., On Periodic Solutions near Equilibrium Points of Conservative Systems . . . . .	143
FABES, E. B., B. F. JONES & N. M. RIVIERE, The Initial Value Problem for the Navier-Stokes Equations with Data in $L^p$ . . . . .	222
GLIKSON, A., On the Existence of General Solutions of the Initial-Value Problem for the Nonlinear Boltzmann Equation with a Cut-Off . . . . .	35
GREEN, A. E., & N. LAWS, On the Entropy Production Inequality . . . . .	47
HAYES, M. A., & R. S. RIVLIN, Energy Propagation in a Deformed Elastic Material . . . . .	54
HILL, C. D., & D. B. KOTLOW, Classical Solutions in the Large of a Two-Phase Free Boundary Problem. I . . . . .	63
JONES, B. F., see FABES, E. B., <i>et al.</i> . . . . .	222
JOSEPH, D. D., & D. H. SATTINGER, Bifurcating Time Periodic Solutions and their Stability . . . . .	79
KAUL, H., Isoperimetrische Ungleichung und Gauß-Bonnet-Formel für $H$ -Flächen in Riemannschen Mannigfaltigkeiten . . . . .	194
KOTLOW, D. B., see HILL, C. D. . . . .	63
LAWS, N., see GREEN, A. E. . . . .	47
MARCUS, M., & V. J. MIZEL, Absolute Continuity on Tracks and Mappings of Sobolev Spaces . . . . .	294
MIZEL, V. J., see MARCUS, M. . . . .	294
MÜLLER, I., On the Frame Dependence of Stress and Heat Flux . . . . .	241
PEDERSON, R., & M. SCHIFFER, A Proof of The Bieberbach Conjecture for the Fifth Coefficient . . . . .	161
PELETTIER, L. A., On the Asymptotic Behaviour of Velocity Profiles in Laminar Boundary Layers . . . . .	110
PERKO, L. M., Boundary Layer Analysis of the Wide Capillary Tube . . . . .	120

RIVIERE, N. M., see FABES, E. B., <i>et al.</i>	222
RIVLIN, R. S., see HAYES, M. A.	54
